

Lucas Doyle

AI Full Stack Software Engineer

+353 86 274 5183 @bruno.silva.94410@gmail.com Ireland, Dublin

SUMMARY

AI Full Stack Software Engineer with 7 years of experience designing, building, and scaling SaaS platforms, cloud-native applications, and AI-powered products. Specialized in Python, TypeScript, React, Next.js, Node.js, and modern Generative AI technologies including Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI agents, vector databases, and workflow automation. Proven track record of delivering production-grade AI solutions from concept to deployment, serving thousands of users and driving measurable improvements in efficiency, automation, and customer experience. Experienced in architecting distributed systems, designing high-performance APIs, optimizing cloud infrastructure, and leading full-stack development across frontend, backend, and AI services. Strong collaborator with product, design, and engineering teams, combining technical excellence with business-focused problem solving to deliver scalable, reliable, and user-centric software solutions.

EXPERIENCE

AI Full Stack Software Engineer

Tines

2025 - Present Dublin, Ireland

- Designed and deployed production AI applications using OpenAI GPT-4, FastAPI, Next.js, and TypeScript serving 10,000+ monthly users.
- Built enterprise-grade Retrieval-Augmented Generation (RAG) systems and multi-agent AI workflows using OpenAI embeddings, LangChain, LangGraph, and Pinecone vector databases.
- Integrated Large Language Models (LLMs) into customer-facing applications, reducing manual workflows by 60% and improving operational efficiency.
- Created scalable backend services using FastAPI, Node.js, and PostgreSQL supporting thousands of API requests daily.
- Implemented authentication, payment processing, monitoring, and cloud deployment pipelines on AWS.
- Optimized AI inference workflows through caching, prompt engineering, and response streaming, improving response times by 40% while reducing operational costs by 35%.
- Developed responsive AI-powered user interfaces using React, Next.js, and TypeScript, including real-time experiences with streaming AI responses and interactive workflow automation tools.
- Collaborated with product, design, and engineering teams to deliver intuitive AI-driven experiences that increased user engagement and feature adoption.

Senior Full Stack Software Engineer

Ding

2022 - 2025 Dublin, Ireland

- Led development of enterprise-scale web applications using React, Next.js, Node.js, Express, and PostgreSQL.
- Designed and implemented RESTful and GraphQL APIs supporting high-traffic production environments.
- Built real-time dashboards and analytics systems processing large-scale operational data.
- Improved application performance by 30% through database optimization, indexing strategies, and service refactoring.
- Introduced automated testing, CI/CD pipelines, and engineering best practices that improved deployment reliability.
- Collaborated with cross-functional stakeholders to deliver scalable software solutions across multiple industries.
- Mentored junior developers and conducted architecture reviews and technical planning sessions.

Software Engineer

Flipdish

2018 - 2022 Dublin, Ireland

- Developed full-stack applications using Python (Django, Flask), React, and Node.js.
- Built API integrations, backend services, and data-processing systems for web and mobile applications.
- Improved system stability and reduced production incidents through monitoring, debugging, and automated testing.
- Participated in Agile development processes, sprint planning, code reviews, and continuous delivery practices.
- Worked closely with designers, product managers, and engineering teams to deliver high-quality software solutions.
- Enhanced frontend performance and accessibility across multiple large-scale applications.

EDUCATION

BSc in Computer Science
University College Dublin
2014 - 2018 Dublin, Ireland

SKILLS

AI & Machine Learning

Python	OpenAI API	Claude API	Gemini API	Large Language Models (LLMs)		Prompt Engineering
Retrieval-Augmented Generation (RAG)			AI Agents	LangChain	LangGraph	Vector Databases
Semantic Search	Embeddings	AI Workflow Automation		OpenAI Assistants	API	Function Calling
Model Context Protocol		Prompt Optimization	LlamaIndex	Agentic AI Systems		

Programming Languages

Python	TypeScript	JavaScript	SQL
--------	------------	------------	-----

Backend Development

FastAPI	Django	Flask	Node.js	Express.js	REST APIs	GraphQL	Microservices
WebSockets							

Frontend Development

React	Next.js	TypeScript	HTML5	CSS3	Tailwind CSS
-------	---------	------------	-------	------	--------------

Databases

Git	PostgreSQL	MongoDB	Redis	Pinecone	Weaviate	ChromaDB
-----	------------	---------	-------	----------	----------	----------

Cloud & DevOps

AWS	Docker	Kubernetes	CI/CD	GitHub Actions	Vercel	Linux
-----	--------	------------	-------	----------------	--------	-------

Software Engineering

System Design	Distributed Systems	Scalability	Performance Optimization	Testing	Code Reviews
Agile/Scrum	Technical Leadership
